

Class Name: Visualize World Geography

Teacher: Trish Hillmann Akouka

Grade Levels: 4th - 8th Grade

Class Description: Can you find Italy on a world map... because it looks like a boot? Be able to find all countries as easily with the Visualize World Geography method. The VWG method replaces the outline of each country with an easily recognizable object, like Italy as a boot. We call these country-objects “pictographies.”

This method is fast and long lasting—

Also, by using highly effective mnemonics, or associative clues, presented in an entertaining format, you and your student(s) will AUTOMATICALLY pull up the visual of a country in your mind’s eye—its shape, relative size, location, even its bordering countries—whenever you hear or read the name of that country!

What to expect: Super FUN and silly way to learn world geography. I used this curriculum with all 3 of my boys and was AMAZED at what they learned!!

We will work one day a week in class and expect to do another fun lesson (or 2) for homework.
